(54) Title: SHAVING APPARATUS

(57) Abstract: A shaving apparatus has at least one shaving head (3) with at least one cutter (6), a trimmer (7), and a drive structure including a motor (16) for driving the cutter or cutters (6) and the trimmer (7). The trimmer (7) is disengageable from the drive structure. Reversing means (32-36) are provided for reversing at least a portion of the drive structure between a first sense of rotation and a second, opposite, sense of rotation. A unidirectional clutch (22) is arranged between the portion of the drive structure of which the sense of rotation is reversible and the cutter or cutters (6). When the sense of rotation is reversed from the sense of rotation in which the cutter or cutters (6) is driven, the trimmer (7) can be driven without driving the cutter or cutters (6).
